Our PlanetOne ERP Sales Order Management System allows you to optimize the way you make your quotation, approval process and the fulfillment of your sales orders. Users can split orders across multiple warehouses; verify credit limits, issue purchase orders related to the specific sales orders, and more.

### ***CONFIGURABLE MODULE AND CUSTOMER SETUP***

#### **Easy Sales Forecast / Sales Quotation / Sales Order Creation**

Users can easily select customers and items, along with viewing all the necessary details prior to approving the documents.

#### **Integrated Workflow.**

Sales users can automatically send their request to the warehouse users to notify the shipment, and as soon as the shipment has been prepared, the billing department can issue the sales invoice that has been automatically generated from the system.

#### **Configurable Order Types.**

Users can easily define their own Order Types for common distribution and operations. Also, you can define custom order types to meet specific order processing requirements.

#### **Flexible Discounts and Promotions.**

Our sales order management system allows you to manage complex pricing and discount policies. Users can setup quantity and volume discounts as a discount string or an absolute discount amount.
