PlanetOne Assets Management software is an easy-to-use asset management software system that helps companies in asset intensive industries increase their return on investments while decreasing costs of operation. PlanetOne Assets Management links your asset management, maintenance management, inventory and purchasing functions together for quick and easy viewing and decision-making.

ASSETS MANAGEMENT

CONFIGURABLE MODULE AND ASSETS SETUP

Start-up the Assets Management Module

You can define your own unlimited set of asset groups. You can link parts from inventory and parts warranty tracking. You can attached all file types: manuals, invoices, etc.

Preventive Maintenace.

Maximize your resources, reduce downtime and increase efficiency with PlanetOne Assets Management System. Our easy-to-use, intuitive system helps you identify potential breakdowns and prevent equipment failure—impacting your production and profits. Users can generate job order for preventive maintenance task.

Scheduling.

PlanetOne Assets Management System allows user to be able to setup the maintenance schedule per asset item. User can enter the specific vendor for carrying out the maintenance task. After the job is done, user can enter the actual carried-out vendor for that specific job order.
